FLAGS SPECIAL TO STEAL RIDE

Texas Stops Train of Railroad Presidents—E. P. & S. W. to Ballast the Track.

Pastura, N. M., Feb. 22.—For unmitigated nerve Jerry Wells, a 15 year old boy from Wichita Falls, Texas, takes the blue ribbon in the tramp line.

When the Golden State Limited pulled out of Tucumcari the lad climbed boldly onto the pilot, suit case in hand, carefully adjusted the suit case directly in front of the engine number and sat down on it. As the Golden State was pulling into Hanley, 11 miles out of Tucumcari, a cow on the track just ahead, caused the kid to shift his position so that he attracted the attention of the engineers who promptly slowed down and unloaded him.

President James Douglas's special was following the Golden State just a few minutes behind. The boy unconsciously drove the bunch of cattle back on the track when the special came in sight, hid himself in a culvert nearby and when the special slowed down he crawled on the pilot, again carefully adjusted his suit case for a cushion, sat quietly down and rode into Pastura, 69 miles, without change. The special stopped at Pastura to take water, the engineers came around ooking up, and Wells was put off. He quickly went to the Pintada Trading Co's store, and assuring the manager, Mr. Wolff, that he was on a job, he was given a job of cutting wood for his dinner. About the time he had surrounded himself with a square meal a light extra headed west arrived. He grabbed his suit case and made for the water tank, remarking as he went that that was his train and that he had to be in Carizozo that night, as he had written to his sister that he would be there and that she would be at the depot to meet him. He crawled on the head end of the light engine just as it was pulling out. The crew stopped, slowed down and put him off just west of the depot, but as the train went out of sight some section men saw him hanging to the back end of the tender, his suit case dangling by one small strap.

The E. P. & S. W. is going to put on a force of several hundred men between Santa Rosa and Vaughn ballasting track right away. The ballasting force was cut off during December in order to reduce expenses before the ending of the fiscal year, but it was understood at the time that the work would be completed in the spring. About 25 miles of track will be raised and rock ballasted, and it will probably require a force of 200 men two or three months. The headquarters will be at Aragon, three miles from Pastura.

Too Much Water on the Hair a Mistake

(From Toilettes of Today, Paris).

"If your hair is becoming dry and brittle, breaking off and losing color, follow the lead of the many who have abandoned the use of soap and water and taken up the new method of dry shampooing," said Charibel Montague in her lecture on "Beauty" at the Theater Monnet, Thursday. "It has been proved beyond question that too frequent wetting and the application of alkaline substances to the hair is a mistake.

"Even those who formerly were devoted to shampooing with eggs now use therox and orris root, and they unhesitatingly declare that this dry shampooing makes the hair as bright and fluffy as ever did eggs.

"To make the dry shampoo mix four ounces of powdered orris root with four ounces of therox. Sprinkle a tablespoonful of the mixture on the head and brush it well through the hair. Do this once or twice a week if the hair is thin and scanty and you will soon notice a new growth of hair. Nothing will make the hair so naturally fine and lustrous as this dry shampoo."
